

How to Use PHx Drive

PHx Drive is a self-hosted file-synchronisation product for PharaonX. It gives each user a desktop application that keeps a local folder continuously in sync with a private PharaonX cloud store — the same experience as Microsoft OneDrive, but fully self-hosted and under PharaonX control.

1. Logging In

User is prompted to sign in with their frappe drive assigned email and password.

The screenshot shows a desktop application window titled "Electron". Inside the window is a login form for "PharaonX". The form features the PharaonX logo (a stylized red 'P') at the top, followed by the text "PharaonX NO LIMITATIONS" and "Sign in to PHx Drive". Below this are two input fields: "Email address" with the placeholder "you@pharaonx.com" and "Password" with a toggle icon. A red "Sign In" button is positioned below the password field. At the bottom, a grey box displays demo credentials: "Demo: rahaf.hazem@pharaonx.com / PHx2026!".

2. Choosing a Sync Folder

When a user is using the app for the first time they are redirected to the settings page to choose a sync folder to sync with frappe drive.

Clicking "browse" opens a window to choose sync folder.

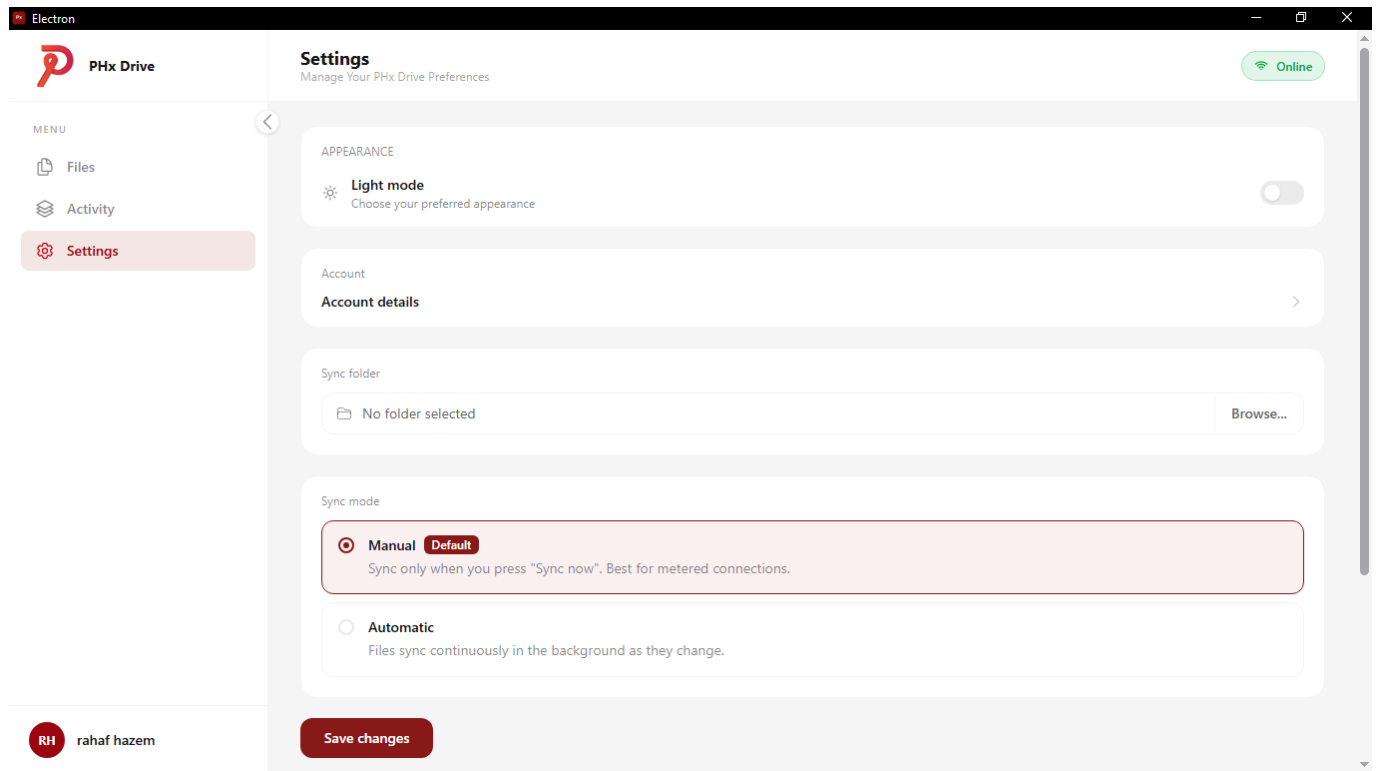

The user then clicks "save changes" to apply changes. To the sync folder and sync mode

3. Choosing a Sync Mode

There are two sync modes to choose from: Manual Sync and Automatic Sync.

Manual Sync

Manual Sync is the default sync mode. When chosen, the user has to click the "sync now" button in the main page to start syncing files.(See "4. Exploring the Files Page")

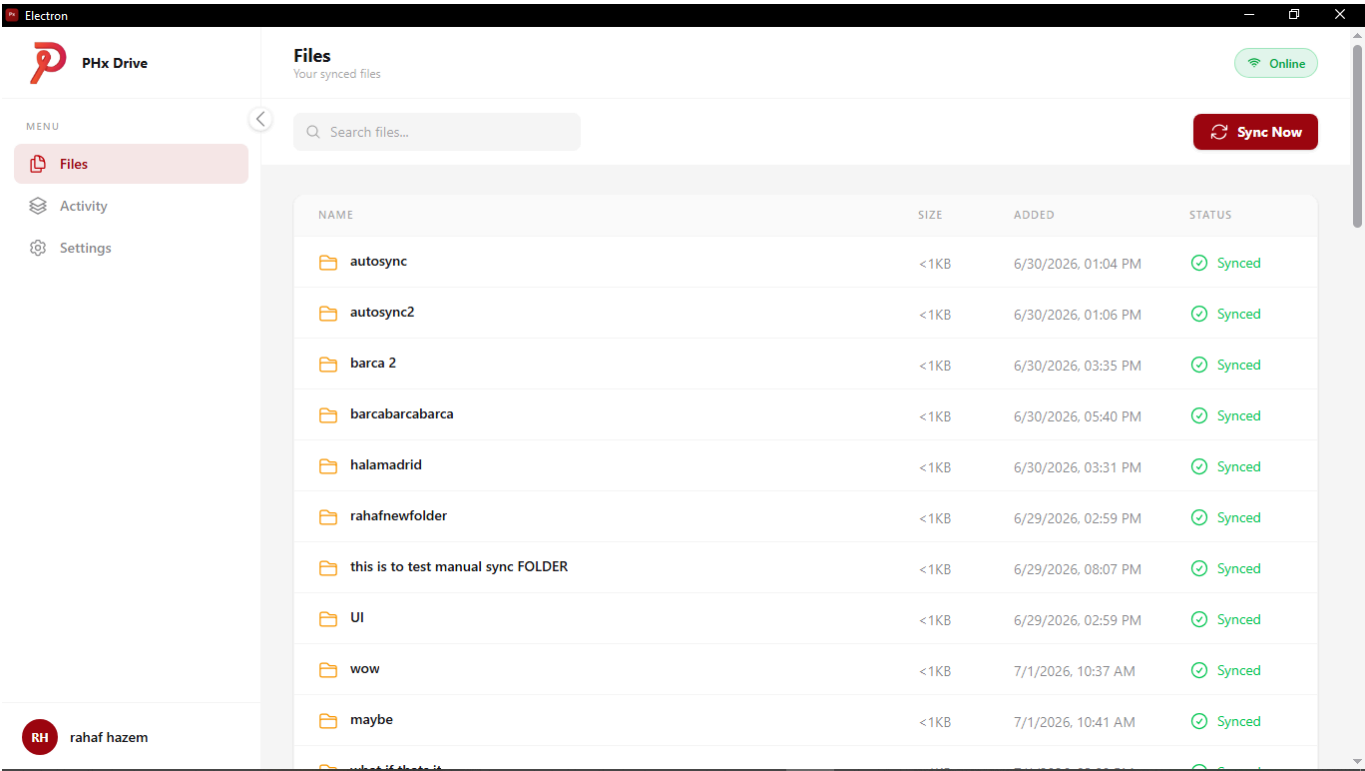

Automatic Sync

Automatic Sync syncs files automatically by listening every 15 seconds for changes on both the local sync folder and frappe drive

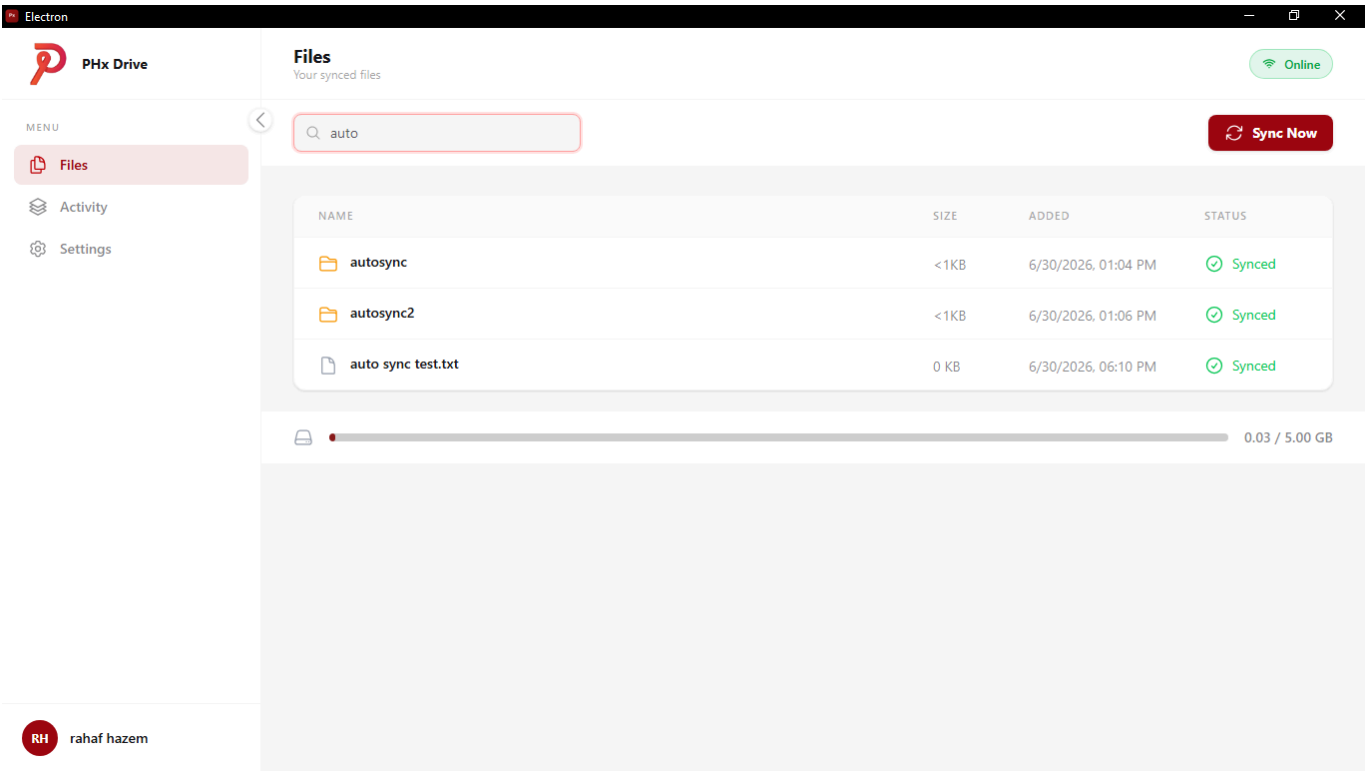

To change sync mode: Settings > choose sync mode > Save changes

4. Exploring the Files Page

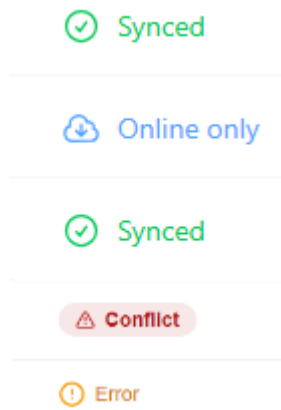

This is the main page that displays synced files and their state

User can search for files:

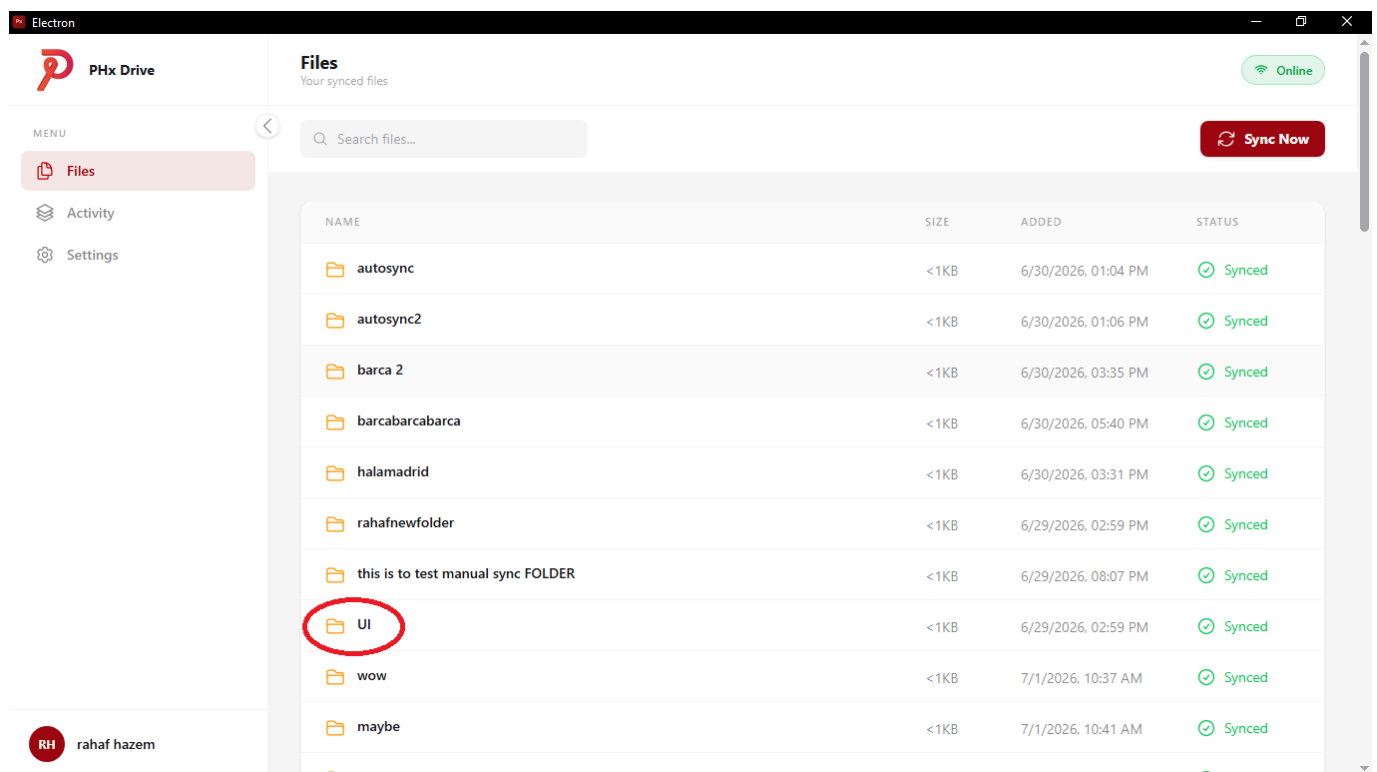

The state column has different states depending on file sync state:

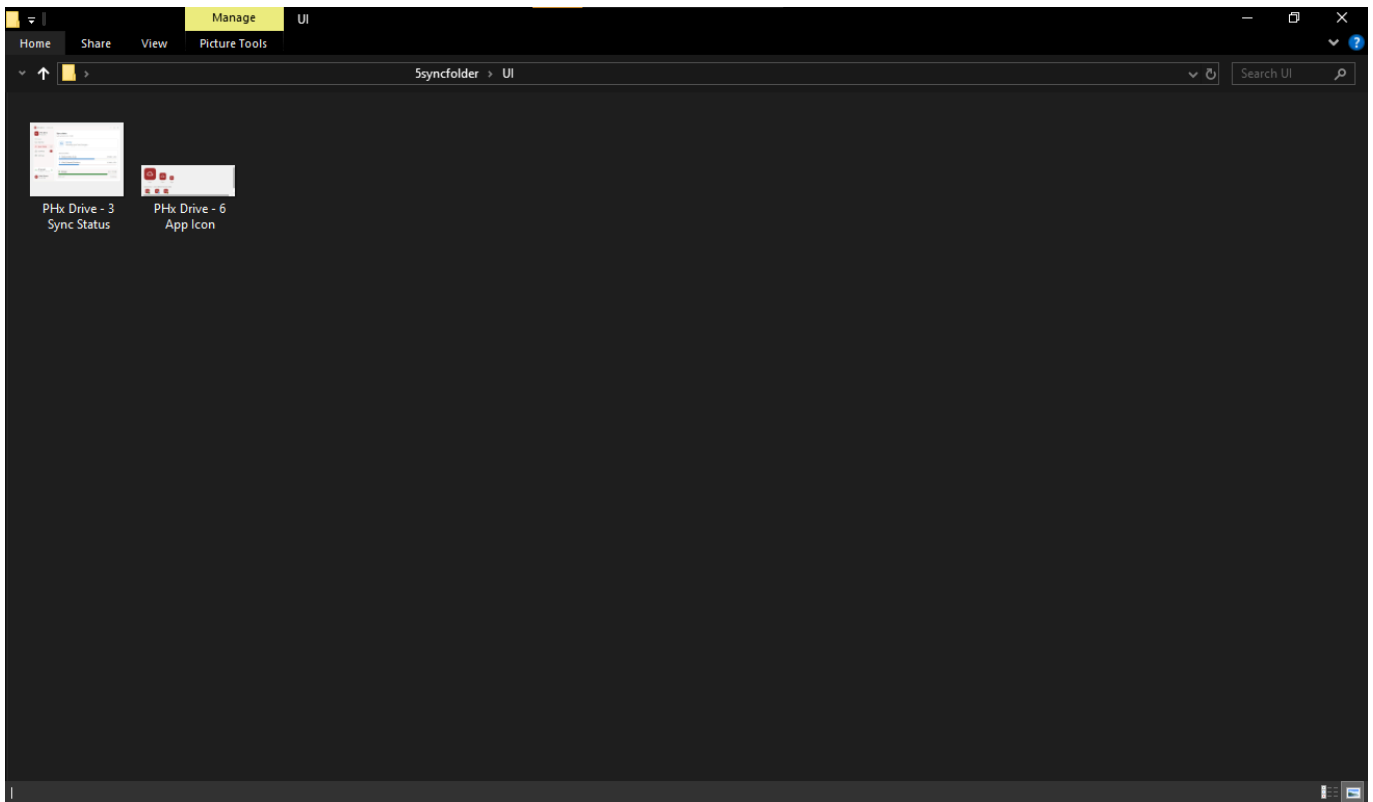

User's frappe storage quota is displayed at the end of the page:

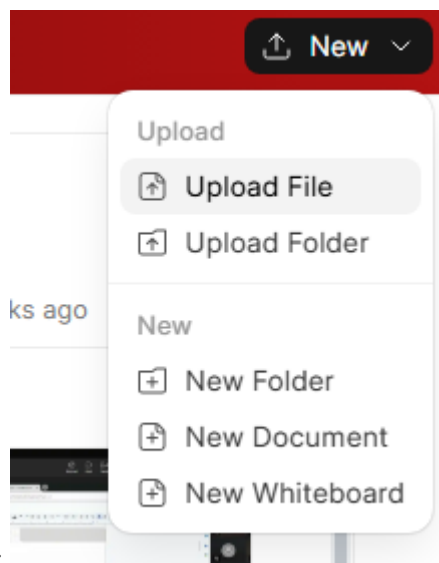

For folders user can click on a certain folder in the table to open it in the local file explorer

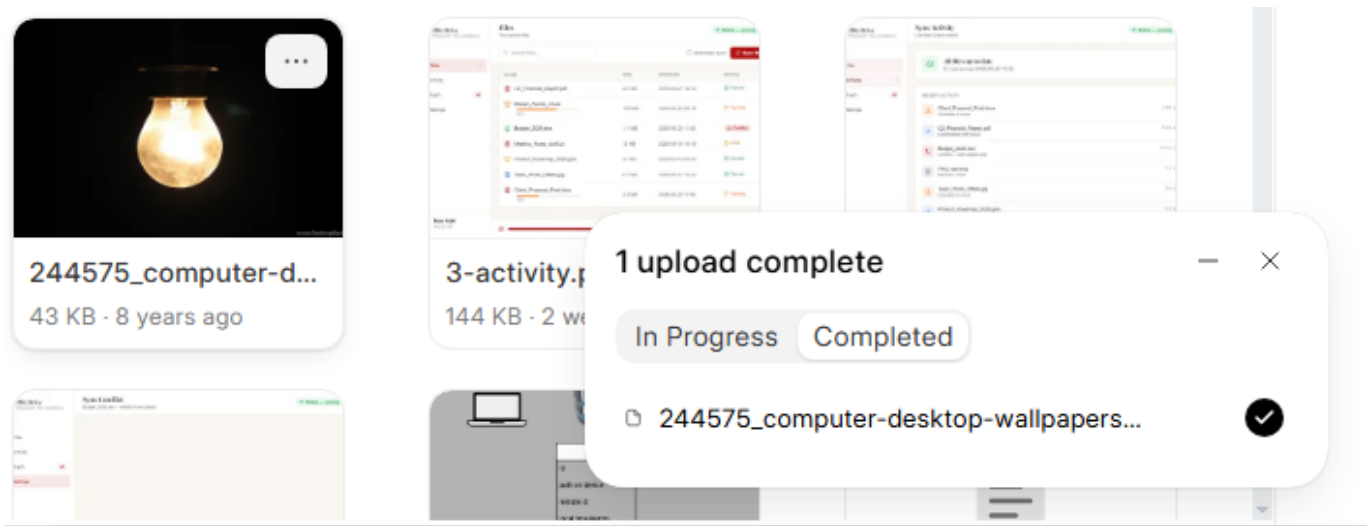

5. Uploading Files

Go to frappe drive and upload a file:

Go to the main page then click "sync now" button (automatic sync will automatically detect the file).

The file will show up as an "online-only" row.

	244575_computer-desktop-wallpapers-hd-hd-wallpapers-lovely_1920x1200_h.jpg	43 KB	7/13/2026, 02:20 PM	 Online only
---	--	-------	---------------------	---

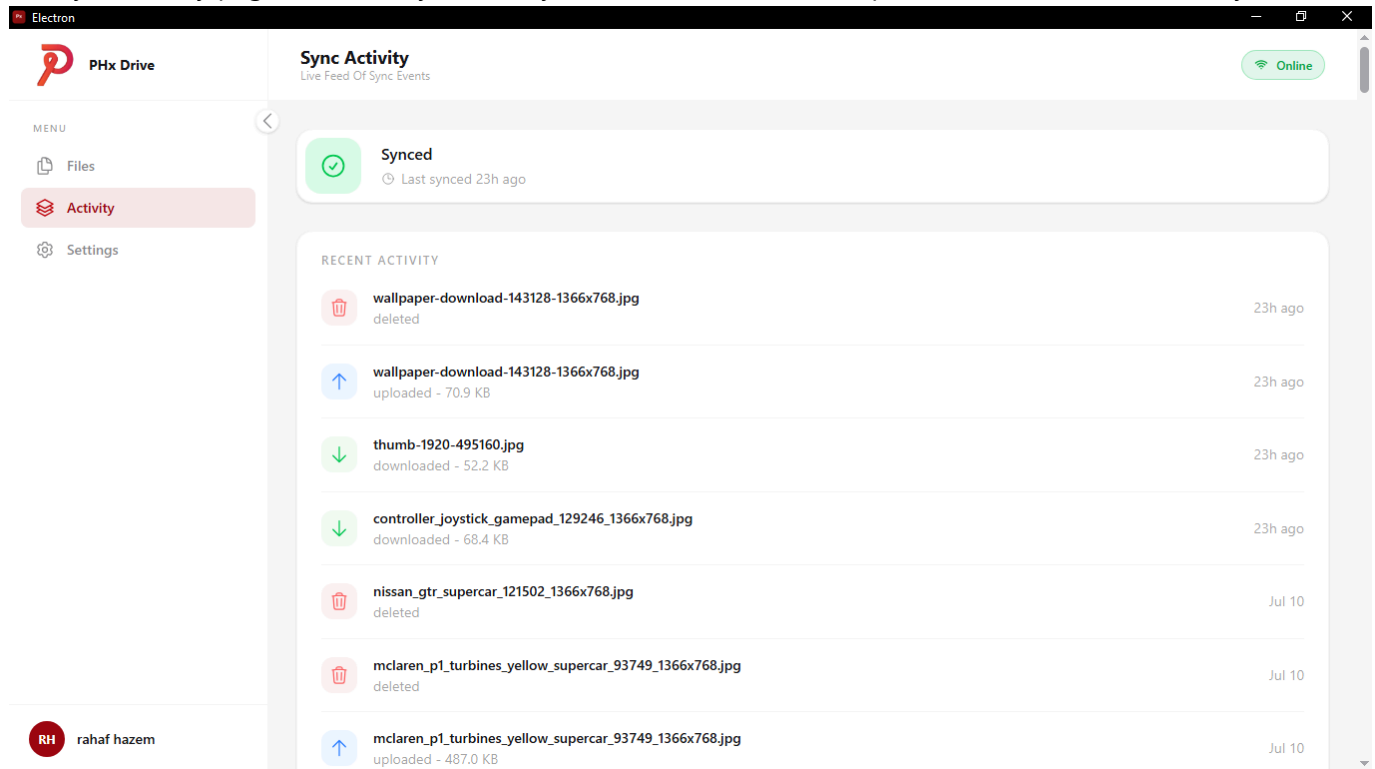

A 0-byte placeholder file of the same file extension will be added to the local sync folder. Clicking on "Online only" downloads the files to the local sync folder.

6. Deleting Files

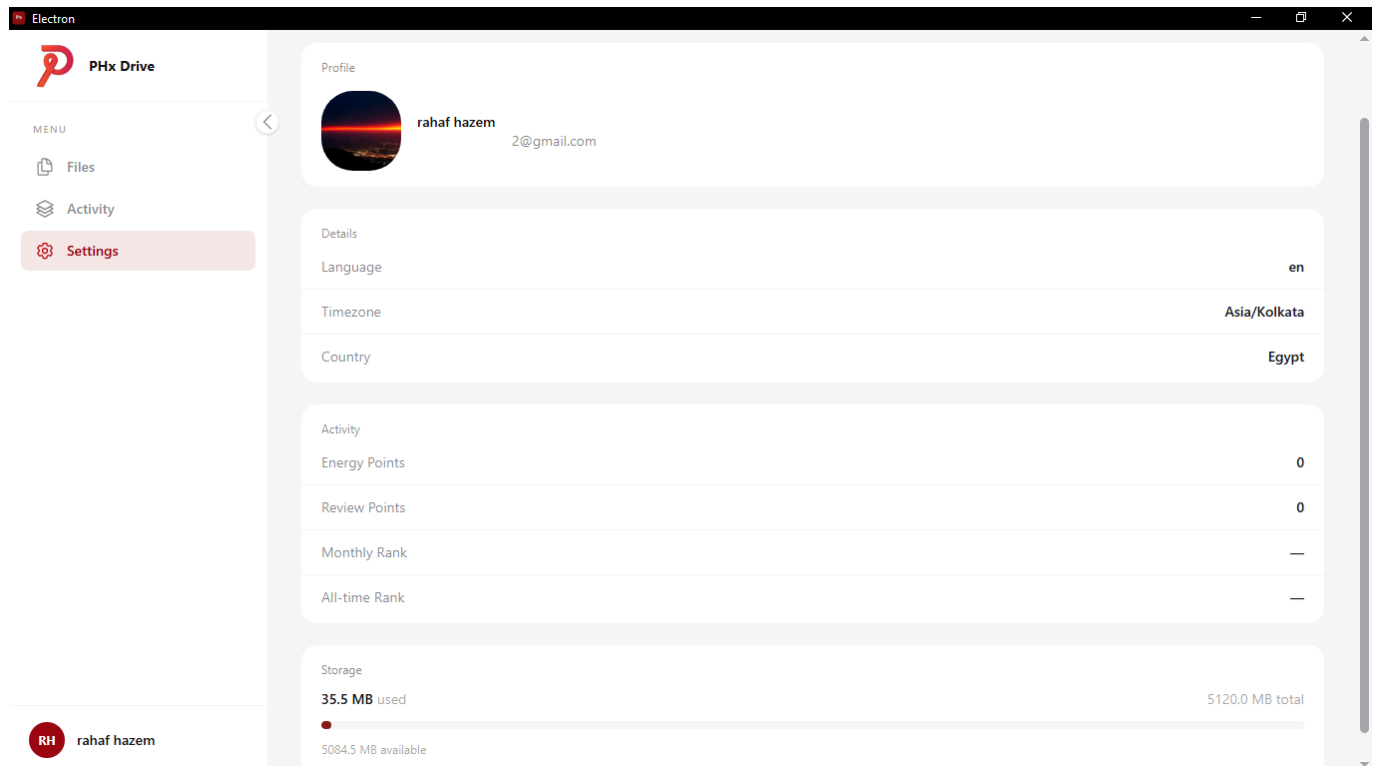

Deleting in PHx Drive is bidirectional. Deleting a file from frappe drive removes it from the sync folder and deleting a file from the local sync folder removes it frappe drive. Deleted files (whether locally or remotely) will be found in frappe drive's trash.

7. Sync Activity

The sync activity page shows all sync activity for all files with timestamps and states for the last 7 days.

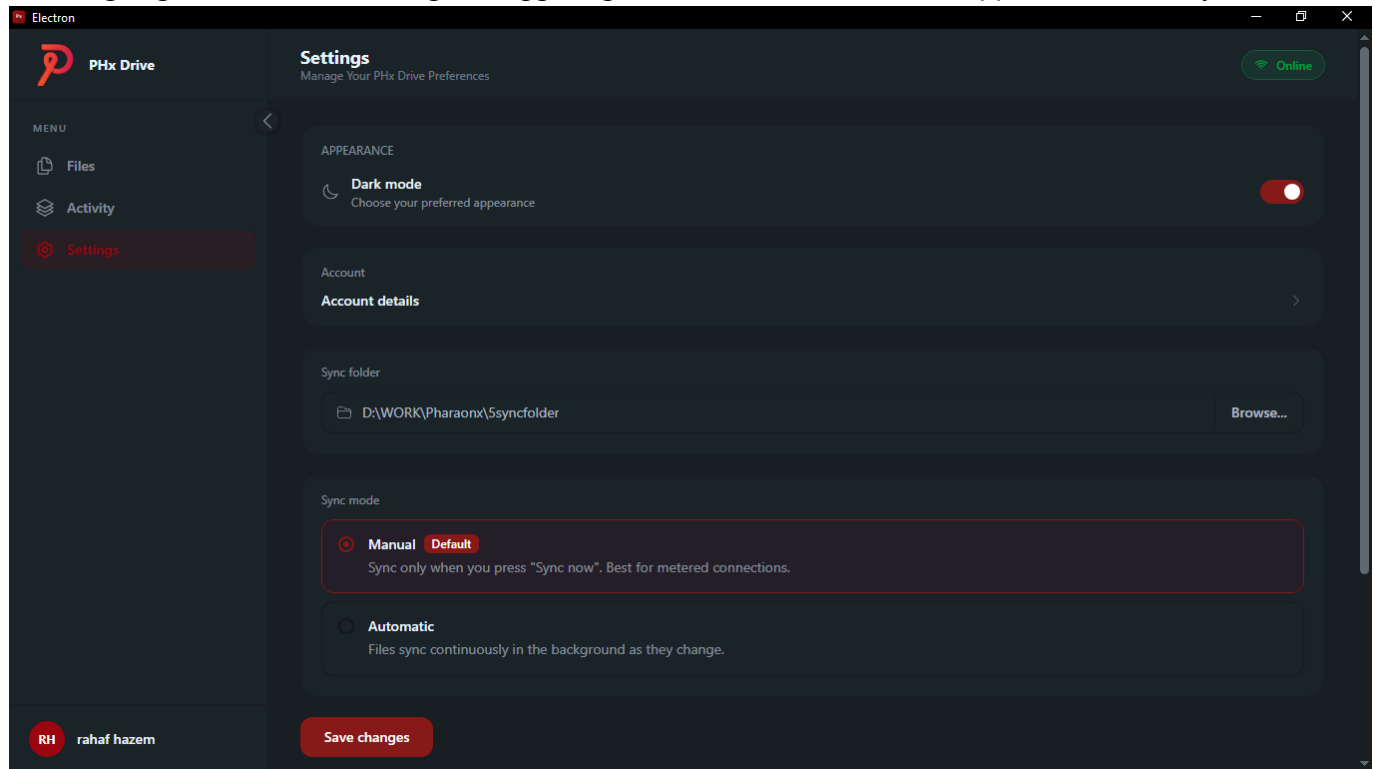

8. User Account Info

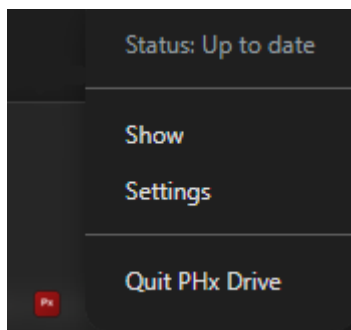

9. Dark Mode

To change light/dark mode: Settings > Toggle Light/Dark mode and theme is applied immediately.

10. System Tray

PHx Drive continues running in the background after you close the main application window. Instead of exiting, the application is minimized to the **System Tray**, allowing synchronization to continue without keeping the main window open. The tray menu also shows sync state.

To reopen PHx Drive from the tray: "Show"

To reopen PHx Drive and go to Settings: "Settings"

To quit the app: "Quit"

Closing vs. Quitting

Closing the PHx Drive window **does not** stop the application. The app continues running in the background so it can keep monitoring and synchronizing your files according to your selected sync mode.

To completely stop PHx Drive:

1. Open the System Tray menu.
2. Select **Quit**.

Choosing **Quit** completely closes the application and stops all background synchronization. To resume syncing, launch PHx Drive again from the Start Menu or desktop shortcut.
